Elite Petro & Gas
"PETROLEUM & ENERGY SECTOR"

Message from the Management

The market dynamics Elite Capital & Co. encountered in 2021 were strikingly reminiscent of those we navigated in 2012, the very year we were founded amidst the global financial crisis. While the traditional banking sector contracted its lending and tightened its flexibility, our emergence during that turmoil afforded us a distinct advantage: we were built for resilience from day one. Rather than inheriting legacy constraints, we developed an agile funding framework specifically designed to thrive under pressure. Those early lessons remain our cornerstone today.

Our ambition knows no bounds. We are steadfast in our vision to become the world's pre-eminent lender within the coming years, yet we do not view this as a race against competitors. Our true differentiator lies in our bespoke, customer-centric approach, one that consistently turns our clients' objectives into tangible outcomes. As incumbent lenders retreat further into caution amidst the current climate, we see not obstacles, but opportunities. This is precisely where our experience, resourcefulness, and flexible capital come to the fore, empowering our clients to move forward with confidence while others hesitate.

Dr. Faisal Khazaal, PhD. LLD. KGCC.
Founder & Chairman

Mr. George Matharu, MBA. Lrd.
President & CEO

Corporate Overview

Corporate Overview

Elite Capital & Co. Limited is a distinguished financial management firm, specialising in project advisory, structured funding, and large-scale development finance. Our primary focus lies in transformative infrastructure and mega-commercial ventures that shape national economies.

From our headquarters at International House, 36-38 Cornhill, in the heart of the City of London, we maintain a truly global footprint. Our board, senior leadership, and on-ground agents are strategically positioned across the Middle East, North Africa, Asia, Europe, and South America, supported by a multilingual team that ensures our solutions are as culturally attuned as they are financially precise.

With deep-rooted expertise in banking syndications and cross-border transactions, we offer a full-spectrum advisory service to private clients, multinational corporations, and sovereign governments. As the exclusive manager of the Government Future Financing 2030 Programme®, we occupy a unique position at the intersection of public ambition and private capital, delivering financial architectures that enable long-term, sustainable growth.

We do not offer off-the-shelf products. Instead, we engineer bespoke funding structures that evolve with market realities and client objectives. Our strategic alliances with leading institutions across Europe, Asia, Africa, and the GCC have granted us privileged access to high-growth markets, allowing us to deploy capital where it is most needed and most effective.

Our Purpose

We exist to turn critical infrastructure into reality. Every project we back is chosen for its capacity to stimulate employment, foster economic resilience, and alleviate poverty. Our ultimate measure of success is not just return on capital, but lasting prosperity for the communities we serve.

Our Project Framework

Sector Coverage: We finance projects across the full spectrum of infrastructure, whether Greenfield (pre-operational) or Brownfield (operational). Our portfolio includes:

- ❖ **Transport:** seaports, airports, rail networks, bridges, and highways.
- ❖ **Utilities:** water treatment, energy generation, and digital communications.
- ❖ **Social Infrastructure:** hospitals, educational institutions, and public facilities.
- ❖ **Industrial Enablers:** manufacturing of core materials (cement, steel) and resource-linked infrastructure.

Project Scale: Minimum commitment of **USD 50 million**, ensuring our capital drives meaningful, high-impact development.

Financing Terms:

- ❖ **Design & Build Phase:** Up to 15 years.
- ❖ **Operational Phase:** Up to 30 years.

Loan-to-Value: We offer financing of up to **85%** of total project cost, subject to due diligence.

Execution Model: All projects are delivered on an **EPC+F** (Engineering, Procurement, Construction + Finance) basis. We do not engage in BOO or BOT structures.

Eligibility & Collateral

Geographic Reach: We consider projects in all stable jurisdictions, excluding nations affected by active conflict, severe political volatility, or international sanctions. All ventures must comply with rigorous environmental, health, safety, and social governance standards.

Who We Work With:

- ❖ Privately held enterprises.
- ❖ Public and private infrastructure operators.
- ❖ National and regional governments.
- ❖ NGOs and development agencies.
- ❖ Financial institutions.

Collateral Flexibility: To secure financing, we accept a range of instruments, assessed on their individual merit:

- ❖ **Commercial Bank Instruments:** Guarantees, bonds, or notes from banks rated 'BB+' or better (exceptions considered case-by-case).
- ❖ **Sovereign Guarantee:** Government-backed guarantees, subject to ratification by the relevant Central Bank and Ministry of Finance.
- ❖ **Resource Guarantee:** Pledges secured against verifiable reserves, including oil, gas, or strategic minerals.
- ❖ **Standby Letter of Credit (SBLC):** An irrevocable SBLC from a top-tier international bank (minimum 'A' rating) serving as a robust security mechanism.

Our Commitment

Elite Capital & Co. is unwavering in its mission to deliver world-class financial solutions that transcend conventional lending. Through our global expertise, strategic partnerships, and innovative structuring, we empower our clients to not only build infrastructure, but to build legacies.

G20 Qualification & Legal Entity Identifier

G20 Qualification & Legal Entity Identifier

Elite Capital & Co. Limited holds a fully validated Legal Entity Identifier (LEI) under the Global LEI System, with code: 254900NNN237BBHG7S26. This registration is issued through Bloomberg Finance LP, an accredited Local Operating Unit (LOU) authorised to administer LEI records across more than 200 jurisdictions worldwide.

The LEI is mandated by key regulatory bodies, including the European Securities and Markets Authority (ESMA), for the reporting of derivative transactions under EMIR, and is a prerequisite under MiFID II and the Market Abuse Regulation (MAR) for all investment firms and issuers of traded securities. In practical terms, any client eligible for an LEI who does not possess one would be unable to execute trades through MiFID II-compliant institutions. Our possession of a valid, active LEI therefore ensures that we remain fully operational, compliant, and transaction-ready within regulated global markets.

The LEI standard, established under ISO 17442, is designed to deliver unambiguous identification of legal entities participating in financial transactions, promoting transparency, mitigating counterparty risk, and streamlining due diligence across borders. Bloomberg further enhances this ecosystem by offering a publicly accessible database of all LEI records it manages, an invaluable resource for institutional research, exposure assessment, and entity verification.

G20 Qualification & Legal Entity Identifier

As a globally recognised financial information and technology leader, Bloomberg provides the infrastructure that connects decision-makers to real-time data, news, and analytics. Our LEI registration through Bloomberg not only affirms our compliance with international regulatory frameworks but also signals our commitment to transparency, operational integrity, and alignment with the highest standards of global financial governance.

G20 Qualification - LEI Code: 254900NNN237BBHG7S26

China-Britain Business Council Membership

China-Britain Business Council Membership

On 5 March 2024, Elite Capital & Co. Limited became a full member of the China-Britain Business Council (CBBC), further strengthening its international economic, political, and financial presence. This milestone aligns with the company's long-term vision of supporting government initiatives through the Government Future Financing 2030 Programme.

China-Britain Business Council Membership

CBBC plays a central role in shaping the modern relationship between the United Kingdom and China. Through its close engagement with the UK Government and the Devolved Administrations, as well as with national, provincial, and municipal authorities in China, the organisation serves as a trusted bridge between both nations. Its work is also supported by strong ties with the British and Chinese embassies.

The Council's origins date back to the early 1950s, when British companies were among the first Western businesses to establish trade links with the newly formed People's Republic of China. This pioneering group, known as the 48 Group of Companies, was founded in April 1954. In parallel, the British Government operated the Sino-British Trade Council, a semi-official body responsible for promoting British participation in trade fairs and exhibitions across China. Although the UK was the first Western nation to recognise the PRC, full diplomatic recognition from China was not formalised until 1972.

In 1991, the 48 Group merged with the Sino-British Trade Council to form the China-Britain Trade Group (CBTG), following an initiative by the UK Department of Trade and Industry. This period marked a renewed phase of high-level engagement. Notably, in November 1992, Vice-Premier Zhu Rongji became the first senior Chinese leader to participate in a seminar with British businesses in the UK, held at the London Stock Exchange and organised jointly by CBTG and the Exchange.

China-Britain Business Council Membership

Reflecting the expanding scope of bilateral business activity, including investment, trade, licensing, and broader commercial cooperation, the organisation adopted the name China-Britain Business Council (CBBC) in 1998.

In November 1999, CBBC hosted a business luncheon at the historic Banqueting House to welcome Jiang Zemin, the first President of the People's Republic of China to make a state visit to the United Kingdom.

The Council celebrated its 65th anniversary at the Annual General Meeting in September 2019, marking another significant chapter in its history. During the event, Sir Sherard Cowper-Coles was welcomed as CBBC's new Chair, and Lord Sassoon was appointed as the organisation's first President.

Today, Elite Capital & Co. Limited is proud to contribute to this distinguished legacy, working alongside CBBC to foster meaningful commercial partnerships and support sustainable economic development between the UK and China.

Accreditations & Compliance

Accreditations & Compliance

Elite Capital & Co. Limited operates within a rigorous framework of internationally recognised quality and compliance standards. Our certifications are independently verified and reflect our unwavering commitment to operational excellence, security, transparency, and ethical conduct.

Accreditations & Compliance

ISO 9001:2015 – Quality Management System

Certificate No: INQ/EN-7802/1021

We are certified compliant with ISO 9001:2015 across our core activities of Financial Management, Consultancy & Funding. This globally acknowledged standard (implemented by over one million organisations across 170+ countries) affirms our adherence to robust quality management principles, including strong customer focus, process-driven delivery, and a culture of continuous improvement that exceeds statutory and regulatory expectations.

ISO 37001:2016 – Anti-Bribery Management System

Certificate No: INAB/EN-7803/1021

Our ISO 37001:2016 certification demonstrates that we have embedded a proactive, risk-based anti-bribery framework throughout our organisation. In an era of heightened transparency, this standard, which replaced the British Standard BS 10500, provides our stakeholders, investors, and partners with the assurance that we have implemented globally recognised good practices to prevent bribery at every level of our operations.

Accreditations & Compliance

ISO 27001:2022 – Information Security Management System

Certificate No: INIS/EN-8373/1221

We hold the current version of ISO/IEC 27001:2022, the definitive international standard for Information Security Management Systems (ISMS). This certification validates that we apply a structured, process-based approach to establishing, operating, and continually enhancing our information security controls, safeguarding our clients' sensitive financial data and our own proprietary intelligence against evolving cyber threats.

Certificate of Compliance – Anti-Money Laundering (AML)

Certificate No: INCO/UK-43991/1023

Our AML compliance framework goes beyond statutory obligation; it is a cornerstone of our fiduciary duty. We operate a stringent, multi-layered verification process for all clients and counterparties, supported by dedicated systems that liaise with legal counsel and banking partners to confirm identity and asset status.

Accreditations & Compliance

As part of our commitment to the international fight against financial crime, and in full alignment with HM Government and the National Crime Agency (NCA), we maintain the following core obligations:

- ❖ **Identification:** Verification of client identity and registered address.
- ❖ **Record-Keeping:** Comprehensive retention of all transaction records and identification documentation.
- ❖ **Monitoring:** Vigilant surveillance of unusual, irregular, or suspicious transactions or contract structures, irrespective of value.
- ❖ **Reporting:** A legal duty to report any suspicious activity to the NCA without delay.

We recognise that these procedures may, on occasion, extend the on-boarding timeline by several days. We nevertheless regard this as an essential investment in integrity, safeguarding our clients, our institution, and the broader financial system from abuse. All client information is handled with the strictest confidentiality and solely for the purpose of meeting our regulatory and security obligations.

Government Future Financing 2030 Program®

Government Future Financing 2030 Program®

At the heart of our institutional offering lies the Government Future Financing 2030 Program® (GFF2030), a flagship initiative of which Elite Capital & Co. Limited is the exclusive manager. This program is not merely a financing facility; it is a strategic partnership model designed to recalibrate the relationship between sovereign ambition and tangible infrastructure delivery.

GFF2030 was conceived to address a fundamental challenge confronting many national economies: the widening gap between developmental aspirations and the constrained fiscal capacity of public treasuries. Traditional lending mechanisms, bound by rigid covenants and short-term horizons, often prove inadequate to fund the multi-decade timelines required for transformative projects. Our program directly confronts this limitation by offering a patient, flexible, and structured financing framework that aligns with the unique fiscal cycles and policy priorities of partner governments.

The architecture of GFF2030 is distinguished by several core features. First, it adopts a whole-of-project lifecycle approach, providing financing that covers not only the design and construction phases, but also the long-term operational and maintenance periods. This ensures that critical infrastructure, whether in transport, utilities, or social sectors, remains sustainable beyond its initial completion. Second, the program incorporates rigorous due diligence and environmental, social, and governance (ESG) standards, ensuring that every project financed contributes to measurable socio-economic development, job creation, and poverty alleviation.

Government Future Financing 2030 Program®

Our exclusive management of GFF2030 leverages the full depth of our firm's capabilities. We deploy our expertise in project structuring, risk assessment, and capital syndication to design bespoke financing solutions for each national context. This involves close collaboration with ministries of finance, central banks, and other sovereign entities, ensuring that every programme component is not only financially viable but also fully integrated with the country's broader development strategy.

Importantly, GFF2030 operates on principles of transparency and accountability. Each project is subject to independent review, and progress is monitored against clearly defined milestones and performance indicators. This rigour not only protects the integrity of the funds deployed but also reinforces the trust that governments place in our firm as a reliable and responsible partner.

In essence, GFF2030 represents our firm's deepest conviction: that infrastructure is the bedrock of prosperity, and that financing it requires more than capital, it requires vision, patience, and a steadfast commitment to the long-term well-being of communities and nations. Through this program, we are not merely funding projects; we are building legacies.

NextGen Industrial Development Fund®

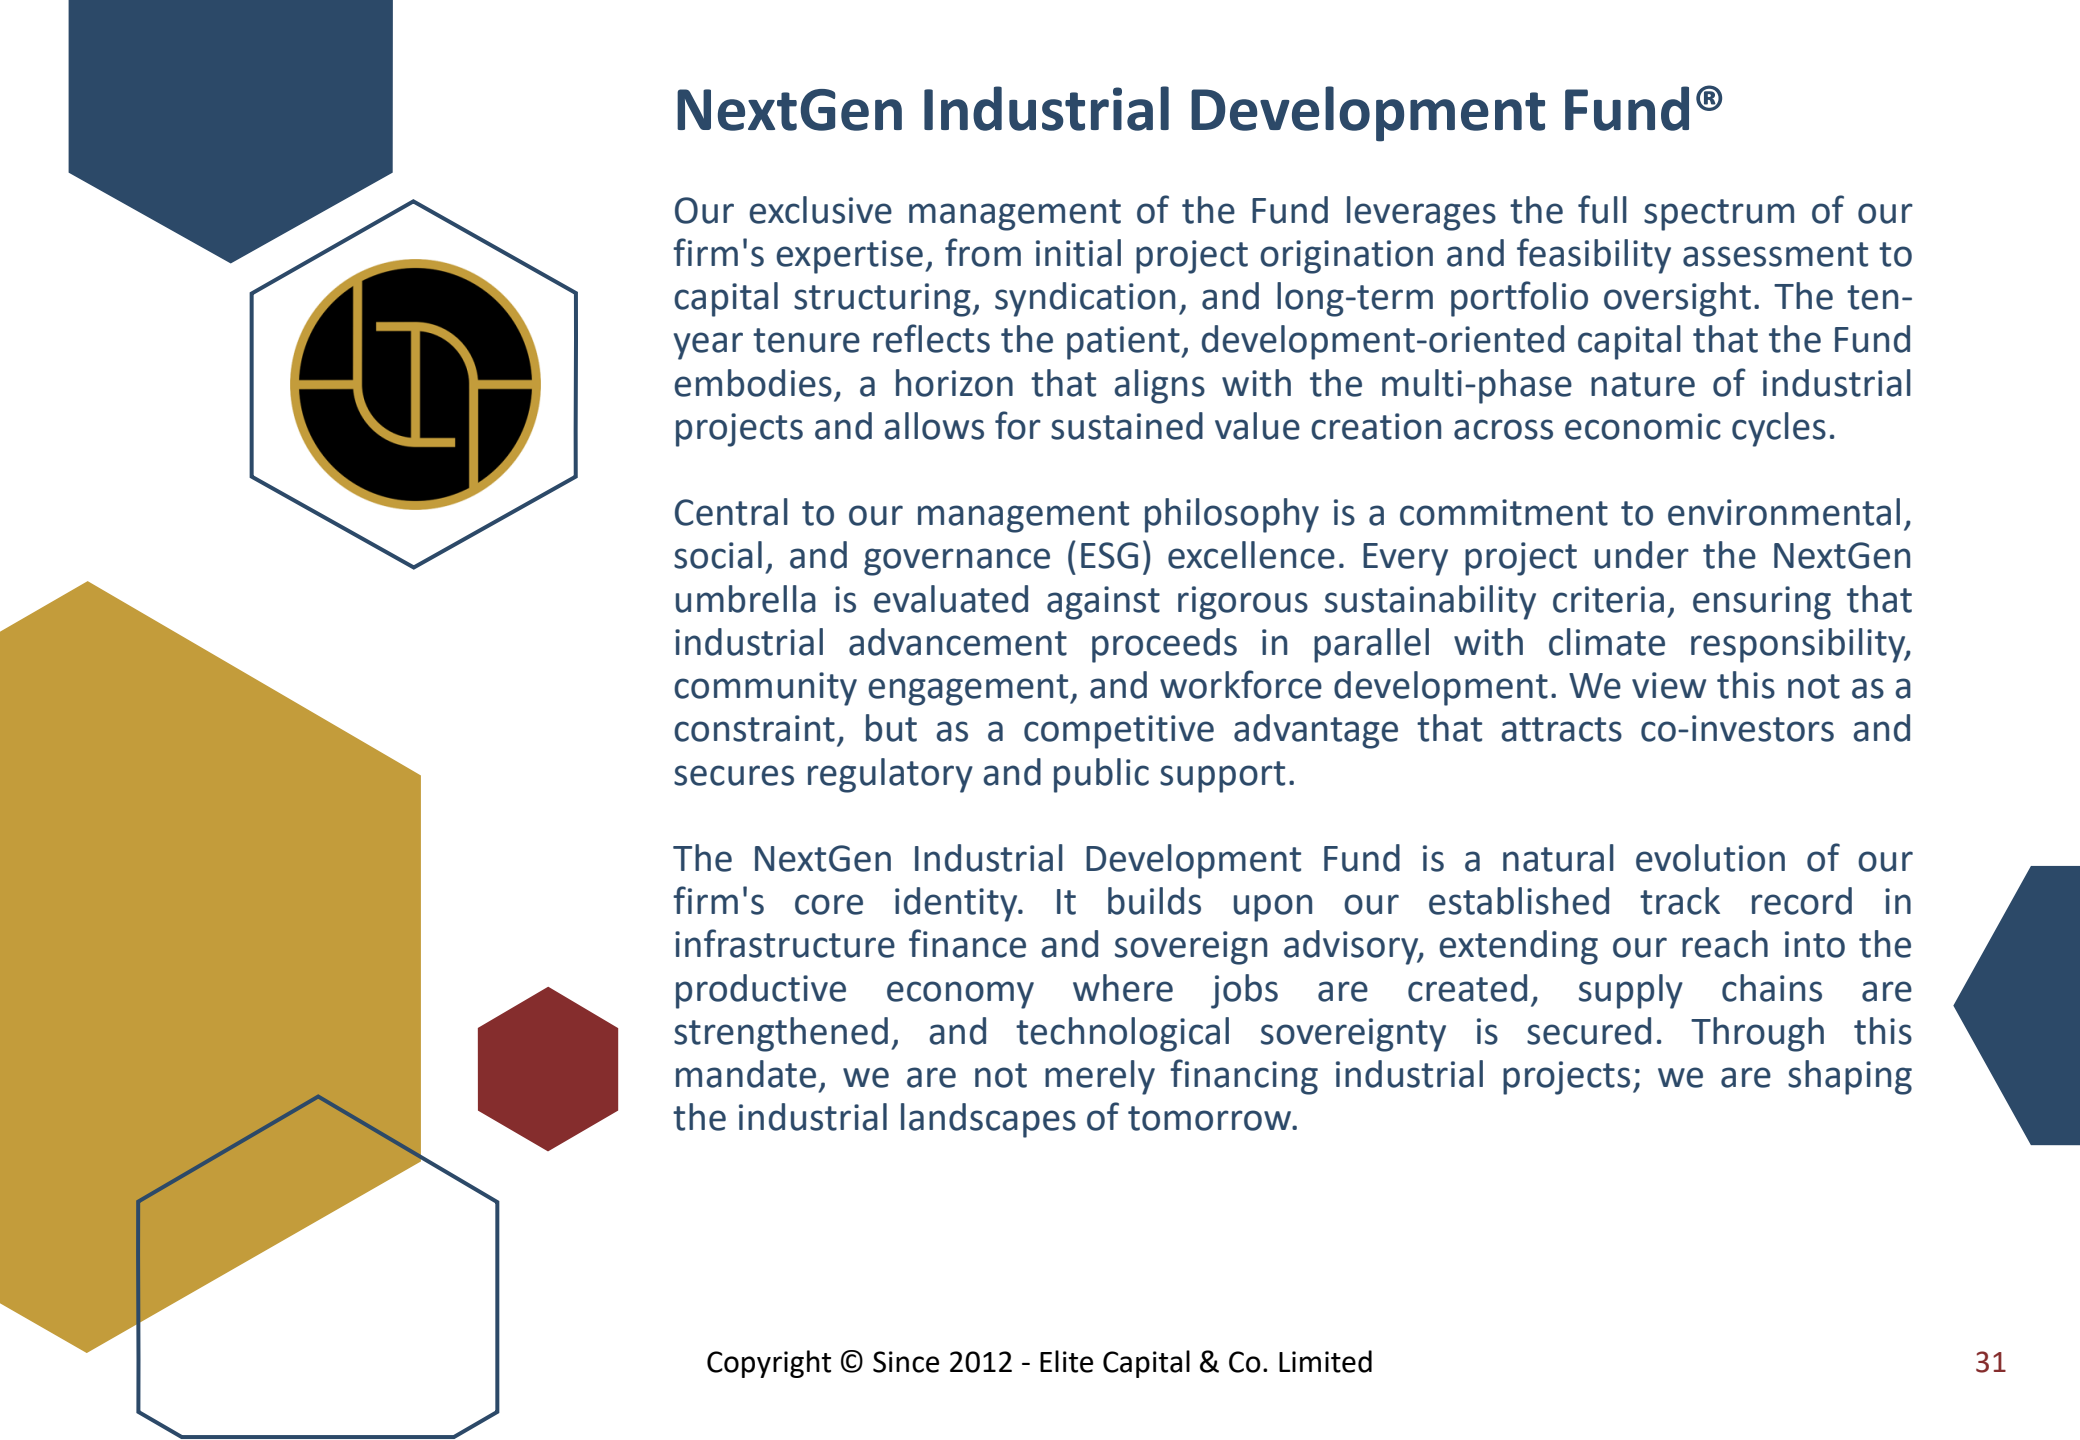

NextGen Industrial Development Fund®

In a significant expansion of our institutional mandate, Elite Capital & Co. Limited has been appointed as the Exclusive Manager of the **NextGen Industrial Development Fund**, under a landmark ten-year tenure. This appointment represents not merely an operational role, but a strategic endorsement of our firm's capacity to orchestrate large-scale, transformational industrial initiatives on behalf of sovereign and institutional stakeholders.

The NextGen Fund is conceived as a dedicated vehicle for accelerating advanced industrialisation across emerging and growth economies. Its scope encompasses the financing, development, and operational enablement of next-generation industrial assets, including but not limited to:

- ❖ **Advanced Manufacturing & Technology Hubs:** Facilities for precision engineering, semiconductor fabrication, and biotechnology production.
- ❖ **Energy Transition Industries:** Large-scale renewable energy component manufacturing, green hydrogen production, and battery gigafactories.
- ❖ **Strategic Resource Processing:** Refining and processing plants for critical minerals, rare earth elements, and agro-industrial commodities.
- ❖ **Industrial Infrastructure:** Dedicated logistics corridors, dry ports, and special economic zones that underpin industrial ecosystems.

NextGen Industrial Development Fund®

Our exclusive management of the Fund leverages the full spectrum of our firm's expertise, from initial project origination and feasibility assessment to capital structuring, syndication, and long-term portfolio oversight. The ten-year tenure reflects the patient, development-oriented capital that the Fund embodies, a horizon that aligns with the multi-phase nature of industrial projects and allows for sustained value creation across economic cycles.

Central to our management philosophy is a commitment to environmental, social, and governance (ESG) excellence. Every project under the NextGen umbrella is evaluated against rigorous sustainability criteria, ensuring that industrial advancement proceeds in parallel with climate responsibility, community engagement, and workforce development. We view this not as a constraint, but as a competitive advantage that attracts co-investors and secures regulatory and public support.

The NextGen Industrial Development Fund is a natural evolution of our firm's core identity. It builds upon our established track record in infrastructure finance and sovereign advisory, extending our reach into the productive economy where jobs are created, supply chains are strengthened, and technological sovereignty is secured. Through this mandate, we are not merely financing industrial projects; we are shaping the industrial landscapes of tomorrow.

Elite Petro & Gas®

Elite Petro & Gas®

As a premier financial management firm, our core mandate has always been project advisory, structuring, and funding. However, our deep engagement with the energy sector, particularly in oil, gas, and power generation, has revealed a fundamental truth: some of the most transformative projects require a partner whose involvement extends beyond the balance sheet. They demand operational insight, technical execution capability, and a shared responsibility for delivery.

It is for this reason, and in unwavering adherence to our principles of probity and professional integrity, that we established **Elite Petro & Gas** as a dedicated execution arm. This strategic vehicle allows us to participate in energy projects not solely as financiers, but as active, hands-on partners in their development and realisation. Crucially, this structure preserves the purity of our core financial management function while empowering us to engage in the full project lifecycle where our expertise and risk appetite are best deployed.

Elite Petro & Gas operates with its own dedicated management, technical teams, and operational protocols, ensuring that each energy project is executed with the specialised focus it demands. Our scope of activities encompasses:

- ❖ **Project Development & Structuring:** From greenfield exploration and field development planning to the design of midstream and downstream infrastructure, we bring technical and commercial rigour to every phase.

Elite Petro & Gas®

- ❖ **Strategic Asset Management:** We provide operational oversight and performance optimisation for energy assets, ensuring they deliver maximum value over their lifecycle.
- ❖ **Integrated Project Delivery:** Where financing is part of the equation, we coordinate seamlessly with our parent firm to provide blended capital and execution solutions, reducing counterparty risk and streamlining decision-making.
- ❖ **Advisory on Energy Transition:** We guide partners through the complexities of decarbonisation, helping them navigate the shift towards lower-carbon energy sources while maintaining operational resilience.

Our qualifications in this domain are underpinned by internationally recognised standards. Elite Petro & Gas holds **ISO 9001 certification** for Quality Management Systems, affirming our commitment to robust processes, continuous improvement, and client-centric delivery.

The establishment of Elite Petro & Gas reflects our firm's mature understanding of the energy sector, that world-class projects require not just capital, but competence; not just oversight, but ownership of outcomes. By maintaining a clear separation between our financial management activities and our operational execution capabilities, we uphold the highest standards of governance, eliminate conflicts of interest, and offer our partners the best of both worlds, financial strength combined with operational delivery.

"WE ARE FUNDING THE WORLD"®

Sponsorship

Elite Capital & Co. Limited has exclusively sponsored "Africa Business Safari: CEMAC", one of the largest conferences in UK at the House of Lords, Chaired by Lord Mohamed Sheikh, the Baron Sheikh of Cornhill. The House of Lords is the second chamber of UK Parliament.

Sponsorship

It was on 17 May 2022 that Mr. Adrian Blantford, who serves as Principal Manager of the Lucas Blantford Racing Team, revealed that Elite Capital & Co. Limited had joined forces with the team as its official sponsor.

Sponsorship

With considerable pride, Elite Capital & Co. Limited lends its backing to a portfolio of racing cars that have consistently claimed victory on some of the most demanding circuits throughout the United Kingdom.

Sponsorship

Elite Capital is proud to have signed in 2017 an international agreement with the Royal Football Federation of the Region of Murcia to support the implementation of infrastructure projects in developing countries. The Royal Football Federation of the Region of Murcia is one of the important royal football federations in the Kingdom of Spain.

Outer Space

Outer Space

The name of Elite Capital & Co. Limited was sent within three official missions to outer space between 2016 and 2020, where its name was placed inside the spacecraft before launch into space.

2016 - OSIRIS-REx is a NASA mission, and Messages to Bennu is a partnership between the Planetary Society and the University of Arizona. NASA chose the University of Arizona to lead its third New Frontiers Mission.

OSIRIS-REx has travelled to a near-Earth asteroid called Bennu and will bring a small sample back to Earth for study. The mission was launched on September 8, 2016 from Cape Canaveral Air Force Station. As planned, the spacecraft has reached Bennu in 2018 and return a sample to Earth in 2023.

Most importantly of all, the name of Elite Capital & Co. Limited will remain outside the boundaries of Earth's atmosphere to swim in outer space throughout the ages because it will remain inside the part of the craft that will stray on the asteroid.

Outer Space

2018 - InSight, short for Interior Exploration using Seismic Investigations, Geodesy and Heat Transport, is a Mars lander designed to give the Red Planet its first thorough check-up since it formed 4.5 billion years ago. It is the first outer space robotic explorer to study in-depth the "inner space" of Mars: its crust, mantle, and core.

Studying Mars' interior structure answers key questions about the early formation of rocky planets in our inner solar system - Mercury, Venus, Earth, and Mars - more than 4 billion years ago, as well as rocky exoplanets. InSight also measures tectonic activity and meteorite impacts on Mars today.

The lander uses cutting edge instruments, to delve deep beneath the surface and seek the fingerprints of the processes that formed the terrestrial planets. It does so by measuring the planet's "vital signs": its "pulse" (seismology), "temperature" (heat flow), and "reflexes" (precision tracking).

This mission is part of NASA's Discovery Program for highly focused science missions, and Elite Capital & Co. Limited is proud that its name was placed inside this spacecraft.

Outer Space

2020 - The Elite Capital name is also placed inside Mars 2020 Mission Perseverance Rover. The Mars 2020 Perseverance Rover will search for signs of ancient microbial life, which will advance NASA's quest to explore the past habitability of Mars. The rover has a drill to collect core samples of Martian rock and soil, then store them in sealed tubes for pickup by a future mission that would ferry them back to Earth for detailed analysis. Perseverance will also test technologies to help pave the way for future human exploration of Mars.

Strapped to the rover's belly for the journey to Mars is a technology demonstration - the Mars Helicopter, Ingenuity, may achieve a "Wright Brothers moment" by testing the first powered flight on the Red Planet.

There are several ways that the mission helps pave the way for future human expeditions to Mars and demonstrates technologies that may be used in those endeavours. These include testing a method for producing oxygen from the Martian atmosphere, identifying other resources (such as subsurface water), improving landing techniques, and characterizing weather, dust, and other potential environmental conditions that could affect the future.

Outer Space

The name of Dr. Faisal Khazaal, Founder and Chairman of Elite Capital & Co. Limited, and the name of his daughter are also listed along with another 1.2 million inhabitants of the earth who had their names carried by the Curiosity Rover which was launched from Earth in 2011 and landed on planet Mars. Since then those people and their siblings have the priority to live and invest on Mars as per the space laws of earth. In addition to that, Dr. Khazaal was one of those who participated in the funding of the spacecraft LightSail. Being recognized for his participation he was granted ownership of a square centimeter of this spacecraft as a symbolic property for his belief in the importance of space science.

UK & International

Elite Capital & Co. Limited (“ECC”) is a distinguished financial management firm, incorporated with the Registrar of Companies for England and Wales at Companies House, Cardiff, United Kingdom, on 6th September 2012. ECC was established under the Companies Act 2006 as a private company limited by shares, with its registered office situated in England and Wales.
